Best Food Forward: A Game-Changer

Delivering Health and Hope

Taking Hunger Off the Table for Families
OUR MISSION
We exist to provide households with access to sufficient, nutritious food, and related resources.
We accomplish this through collaboration, efficient operations, education, and innovative solutions to achieve a hunger-free community in southeast Michigan.

OUR VISION
To end hunger in southeast Michigan.

Milk Milestones
Gleaners’ milk movement started with a simple plea in 2015 from a team member: Our families need milk. Milk is expensive, so many families go without, and it’s one of the most-requested yet least-donated food items. In the past four years, Gleaners has donated food items.

Gleaners’ milk program has had a positive impact on families. One parent says, “My son is always so happy when I bring milk home so he can have milk on his cereal. Sometimes he has to eat his cereal without milk because we cannot always afford to buy it.”

We are grateful for the generous support of partners such as Kroger and United Dairy Industry of Michigan that made this achievement possible!

More than 13 million pounds of food were distributed through our network of 328 partner agencies, and out of that amount, more than 18 million was fresh produce. Volunteers completed 7,132 shifts, the equivalent of 7 full-time jobs.

We’ve helped families stretch their food budgets further. The Cooking Matters® Healthy Food Home Delivery program graduated 6,655 participants who were able to save an average of $280 a year—that equals $1.47 million in economic benefit to households. Statistics are an important part of the story—but it’s not the whole story. In the past few years, Gleaners has shifted how it measures success from pounds to household impact. It’s exciting to see that approach manifest in strategic solutions that will help us reach the next level of our mission to make sure our community’s most vulnerable residents don’t have to worry about where their next meal is coming from.

There are two key areas of growth and innovation. First, the Beat Food Forward, a school-based initiative that aims to bring households in a school district to food security. We hear heartbreaking stories from educators all the time about how children are coming to school hungry because there is not enough to eat at home. You can’t have a food-secure child if they live in a food-insecure household. To address this, Gleaners has been working with a local school district to explore educational outcomes if every student and their family didn’t have to face the chronic stress of hunger.

Second, we are building on the success of our Healthy Food Home Delivery program to better serve food-insecure patients with complex health needs. Through this initiative, we’re looking at how better access to nutritious food affects health outcomes. So far, with our first healthcare pilot done in partnership with Henry Ford Health System, our efforts have helped closed the gap for a majority of food-insecure patients, with more than 95 percent saying the food packages met their needs.

We are now working with more partners such as Community Health and Social Services (CHASS) Center in Southwest Detroit and the National Kidney Foundation’s Diabetes Prevention Program.

As we plan for the future, we are using evidence-based data to devise solutions that will not only address the root of the problem, but will also help more struggling families prosper and thrive.

Thank you for all you do for Gleaners. It is our honor to stand with you in the fight against hunger.

President & CEO
Gerald F. Brisson,

President & Chair
Jim Tompkins,
The Henry’s Groceries pilot wraps up in May. Groceries and say, oh I got a meal right here.” something together with the food from Henry’s. So when I had no food, I could just throw helping me way before I got my food assistance. your grocery bill,” she says, adding, that it “was give you this food where you could cut down “It was a really good program because they benefits assistance, times were lean. It also helped her stretch her food budget because the weeks before she received her food receiving the healthy food boxes, she felt she had participation in October and says while she was prediabetic while on the program, completed her the program. The 49-year-old, who was says she dropped a few pounds after ending after an orientation session for The Healthy Table, a program she signed up for after speaking with her doctor. Aside from receiving boxes of healthy food every two weeks, she will also participate in cooking classes at CHASS. Even though she admits she’s not a good cook, she’s excited to try the recipe using the eggs, cheese, and vegetables she just received. Before the orientation, she had never had a frittata. Despite not having meat in it, the frittata had a lot of flavor, she says, and that was surprising to her. She says her diet has been her “Achilles’ heel.” She is diabetic (her A1C level has gone up and down, but has never been below 7.2), and also has high blood pressure, asthma, and hypertension. The 69-year-old retires sees The Healthy Table as an opportunity to finally get healthier. “I’m getting a little bit more serious about my health and my diet because I wake up not feeling good in the morning. My energy levels are low so I really got to get on this.” The Healthy Table is a partnership between CHASS and as part of Gleaners’ Healthy Food Home Delivery program. The Healthy Table is a partnership between Gleaners and CHASS as part of Gleaners’ Healthy Food Home Delivery program. The first pilot was with Henry Ford Health System (see sidebar) and Gleaners has expanded the reach of its healthcare initiatives to serve food-insecure patients with complex health needs through CHASS as well as the National Kidney Foundation. The project at CHASS launched in late 2018 with the goal to enroll 125 CHASS patients who have a body mass index over 30 and A1C over 8. Every two weeks for six months, patients will receive food boxes that contain all five food groups and a mix of fresh, frozen, and shelf-stable foods. The box is meant to provide a substantial amount of nutritious food for the participant in order to help them improve their eating habits over the long term. To further reinforce healthy eating, participants will also take cooking classes focused on preparing traditional foods in healthier ways, learning health-conscious choices in each food group, and shopping for nutritious foods on a budget. CHASS’ clientele is nearly 80 percent Latino, so there is also a special emphasis on providing culturally appropriate food. “Through CHASS’ health initiatives, the food bank has been exploring how improved access to healthy foods can improve health outcomes among food-insecure households while reducing healthcare costs at the same time,” says Rachelle Bonelli, vice president of programs at CHASS. In Wayne County, the food insecurity rate is 23 percent, making it the most food-insecure county in Gleaners’ service area. Of those people who are food insecure, one in three is not eligible for food and nutrition assistance programs. Food insecurity and chronic disease are highly correlated, and poor nutrition often worsens ongoing health problems and increases the risk of developing chronic disease and poor mental health. Among CHASS’ clients, nearly 22 percent report having a household member in poor health and 33 percent report a family member with diabetes. Aside from the health consequences, food insecurity can also have costly implications for the economy and healthcare system. A 69-year-old retiree, Lanny Grey sees The Healthy Table as an opportunity to finally get healthier. Lanny Grey stands in her River Rouge kitchen unpacking the food just delivered to her home. “I love the canned goods. I’m excited to see beans,” she says as she takes cans and bags out of the box. She pulls out cheese and eggs and remembers the frittata she sampled at her healthcare provider Community Health and Social Services Center (CHASS) a couple weeks earlier during an orientation session for The Healthy Table, a program she signed up for after speaking with her doctor. Aside from receiving boxes of healthy food every two weeks, she will also participate in cooking classes at CHASS. Even though she admits she’s not a good cook, she’s excited to try the recipe using the eggs, cheese, and vegetables she just received. Before the orientation, she had never had a frittata. Despite not having meat in it, the frittata had a lot of flavor, she says, and that was surprising to her. Taking Hunger Off the Table for Families

There have been times when Tonia Worley lay in bed crying at 3 a.m., not knowing how things are going to work out for her and her family and stressing out over bills and medication.

The single mom of two teenage daughters struggles with a chronic autoimmune disease that wreaked havoc on her health, and she’s living on a fixed income of almost $13,000 a year. But there’s one thing that doesn’t keep her up at night – how she’s going to put food on the table. Her daughters receive healthy breakfast and lunch at school, and she receives healthy food through the School Food Mobile pantry at L’Anse Creuse Public Schools in Clinton Township.

Things weren’t always tough for Tonia. She had a good-paying job and her family lived comfortably. In 2007, she went through a bitter divorce and when she separated from her husband, she had only $54 in her pocket.

Then she lost her job after the financial collapse of 2008. After being unemployed for a while, she went back to school to start a new career and became licensed as a certified clinical medical assistant.

And then the health problems started to mount. She suffered from kidney disease and chronic kidney disease.

The food Tonia’s received through Gleaners through the School Food Mobile, “has been exactly what I need … it has literally rescued us.”

“Improving access to nutritious food is a critical step toward reducing the disproportionate rate of chronic disease found among residents in low-income communities,” says Bonelli. “Through our healthcare initiatives with entities such as CHASS and the National Kidney Foundation, we will leverage our expertise on cost-effective food procurement and delivery to better serve low-income participants who struggle with chronic disease and face food access barriers.”

Dr. Felix Valbuena, chief executive officer at CHASS, says the work he does as a doctor in the exam room with a patient will impact only 20 percent of a patient’s health.

“One of my philosophies here at CHASS is what can we do to provide the 80 percent?” he asks, adding CHASS is a “one-stop shop” for services but they can’t offer everything to close that gap. The partnership with Gleaners aligns with that philosophy by helping to offset those social determinants such as transportation and poverty.

To further reinforce healthy eating, participants will also take cooking classes focused on preparing traditional foods in healthier ways.

Valbuena says, because party stores and fast food restaurants are more easily accessible than grocery stores in the community CHASS serves, “We’re very excited about this project,” Valbuena says. “Participants will learn a lot of new skills and information that will help them and then trickle down to their families.”

Gleaners is also working with the National Kidney Foundation to evaluate the effects of pairing food with the Diabetes Prevention Program, a health education program aimed at reducing the risk of type 2 diabetes and chronic kidney disease.

Gleaners says, because party stores and fast food restaurants are more easily accessible than grocery stores in the community CHASS serves, “We’re very excited about this project,” Valbuena says. “Participants will learn a lot of new skills and information that will help them and then trickle down to their families.”

Gleaners is also working with the National Kidney Foundation to evaluate the effects of pairing food with the Diabetes Prevention Program, a health education program aimed at reducing the risk of type 2 diabetes and chronic kidney disease.
When John Bernia was an assistant principal at a middle school, a girl whose family was struggling to make ends meet took drastic measures to feed her family – she snuck back into the school after hours to take food from the kitchen. Her father was disabled and her mother worked as much as she could, but it wasn’t enough. So the girl took matters into her own hands, Bernia says.

It’s stories like these that have stuck with Bernia. And it’s a story that ended well because thanks to community-based partnerships with local churches and nonprofits, the girl was able to get help for her family.

Bernia is the chief academic officer at Warren Consolidated Schools, a district that is working with Gleaners – as well as the Michigan Department of Education, the Food Bank Council of Michigan, and Wayne State University – to bring households to food security through Best Food Forward.

failure and sharp pains in her elbows and hands. She struggled with psoriatic arthritis and psoriasis, and was then diagnosed with lupus about five years ago.

“I enjoyed being able to provide for myself and my daughters the best that I could and when that got taken away from me I had to revamp how I lived.”

Lupus is a chronic autoimmune disease where the body’s immune system attacks tissues and organs, affecting many different body systems. Inflammation caused by lupus can cause kidney damage (kidney failure is one of the leading causes of death among people with lupus) and increase the risk of complications such as cardiovascular disease, infection, and bone tissue death.

With the autoimmune disease “your body turns on itself. It could be something as simple as when you wake up and you’re coughing and your body starts to get aggravated. Your body is attacking your own lungs, which within hours you could drown to death,” Tonia says.

To manage her health conditions, she uses chemotherapy and immune-system depressing medications and tries to eat a healthier diet. The food she’s received through Gleaners through the School Food Mobile “has been exactly what I need … it has literally rescued us.”

She’s made beans and rice, chicken and potato soup, and even her own version of lettuce wraps with ground chicken just like her and her daughters’ favorite dish at P.F. Chang’s. She even made a birthday cake for her youngest daughter using the frozen cherries she received. Not only has the food helped her eat more healthfully to help manage her disease, but also allowed the three of them to enjoy more family meals together.

“I would not be in the situation if I didn’t have to be,” she says. “I enjoyed having a job. I enjoyed being able to provide for myself and my daughters the best that I could and when that got taken away from me I had to revamp how I lived.

“The fact that I’m dragging my kids through it, it’s hard. It’s an everyday battle. And the fact that I know once a month something wonderful is coming for us, it is a godsend. There have been times I had to pay for medicines that were unbelievably expensive, that if it wasn’t for Gleaners’ food, I don’t know where we would’ve been.”
"You can’t have a food-secure child if you don’t have a food-secure household," Gleaners President Gerry Brisson says.

Launched in the summer of 2018, Best Food Forward is a school-based initiative that aims to understand the impact of food security on academic achievement, health, behavior, and economic stability for the students and their families. According to Hunger In Our Schools: Share Our Strength’s Teachers Report, two-thirds of teachers nationwide say children regularly come to school hungry because they are not getting enough food at home. They say this greatly affects students’ ability to focus, their behavior, and their ability to learn. This initiative will look at the outcomes of providing food security.

Gleaners already engages in schools to serve struggling families all across its service area through programs such as School Food Mobile pantries and BackPacks. Best Food Forward goes beyond that. It aims to not only ensure households are food secure, but also improve the way kids learn, engage, and eat at school.

To prepare to launch the pilot in schools next academic year, Gleaners has been taking an evidence-based approach to crafting the most effective solution to ending food insecurity. A dedicated team has been working on immediate achievable successes while developing a longer-term plan for the district. An initial assessment explored current nutrition programs and respective participation rates as well as community partners, curriculum, wellness policies, school-based health services and other considerations. The learnings from this pilot will inform a scalable and replicable model for other Michigan counties.

"We want to make sure that we’re doing all we can as a community resource to support kids and support families. And so that’s why this was so compelling for us to get involved in Best Food Forward," he says.

Warren Consolidated’s rate for kids who qualify for free or reduced-lunch is 68 percent. But it varies from school to school. For example, at the low elementary school, the average is 46 percent and at some schools the average hovers around 95 percent.

"When you look at the reality of what those numbers mean and what that means for kids, it’s very difficult to teach kids and to focus on literacy skills when some of their basic needs are not being met," Barmia says.

When kids are hungry, "no matter how good that lesson is or how amazing that teacher is, they cannot learn if they’re hungry. They cannot come to school and be the very best learner they can be if they’re worried about their safety at home or where their next meal is coming from," says Diane Sozynski, a registered dietitian and director of the Office of Health and Nutrition Services at the Michigan Department of Education.

"If we’re going to give these kids the very best future we possibly can, we need to take those adult worries off their childhood shoulders and allow them to be the children that they deserve to be. So this project for us is that. How do we bring these partners together and truly demonstrate that as adults we can take those adult worries off the shoulders of those children?" Sozynski says the work to feed children aligns with the department’s vision to “be a top 10 education state in 10 years and we know we can’t do that if we don’t put the best learners in the seat possible.”
You can’t see it but it’s there: One in six people in southeast Michigan faces the toxic stress of not having enough to eat.

That’s why Kroger is a proud partner of Gleaners, helping to serve struggling families in southeast Michigan. Kroger is an expert in the grocery business. Gleaners is an expert in food banking. Both are experts in feeding people.

Gleaners and Kroger have a longstanding relationship and share the same mission to fight hunger every day, says Rachel Hurst, corporate affairs manager for The Kroger Co. of Michigan.

Gleaners’ mission “completely aligns with our mission,” she says. “They are our conduit to help feed as many families as we can. Their values align with our values, and we know that they are committed at the same level we are to end hunger.”

As a top Gleaners donor, Kroger’s many supporting initiatives helped provide 1.7 million meals to Gleaners, in fiscal year 2018 alone. Their support ranges from financial sponsorship of events such as the inaugural M.I.L.K. Movement gala, Detroit Uncorked, and Cruisin’ for Zero Hunger at the Dream Cruise, to their annual round-up program in-stores, product donations of nearly 610,000 pounds of food, and in-kind donations. This includes shopping bags for the annual Stamp Out Hunger food drive, and the parking lot use for convenient promotion and drop-off of some of the largest food drives. Finally, Kroger provides the lowest pricing on milk, helping Gleaners distribute 198,000 gallons of milk last year to families in need.

Through its nationwide Zero Hunger | Zero Waste initiative, Kroger aims to end hunger in the communities it serves and eliminate company waste by 2025. Forty percent of the food produced in America goes to waste, yet so many people in the community go to bed hungry.

“We are in the food business to feed people from our everyday shoppers to those that can’t shop with us. This is our corporate responsibility to bring awareness to the reality of hunger and feed more families. We want to serve America through food inspiration and uplift,” Hurst says.

Since the Great Recession, the economy has recovered and many Michiganders hit hard by the economic downturn have gotten back on their feet. But there are many who are still struggling. If the state is going to continue to rebound, we have to invest in its greatest asset—our fellow neighbors. And that’s why Kroger gives.

In 2018, Gleaners’ partnership with Kroger made an incredible impact on their shared mission to end hunger in southeast Michigan.

In 2018, Gleaners’ partnership with Kroger made an incredible impact on their shared mission to end hunger in southeast Michigan.

### Kroger’s Annual Giving Recap

**Winter**

* From Hearts to Homes
* Cruisin’ for Zero Hunger

**Spring**

* Stamp Out Hunger

GLEANERS HARVEST WINTER/Spring 2019

16.7 million pounds of fresh produce provided to hungry families.

1,528 partner agencies engaged to reach hungry neighbors with emergency food.

528 Backpack Program sites feeding 4,440 children at 69 schools year-round.

11,118 School-Based Mobile Pantry sites provided nutritious food for children and their families.

43 million pounds of food distributed throughout the year to neighbors in need.

5,655 Cooking Matters™ graduates;

- Graduates saved an average of $260 per year through improved food management skills.
- This equaled to $1.47 million in economic benefit to households.

57,132 volunteer shifts completed, resulting in 188,236 hours of volunteer work toward Gleaners’ mission, which is the equivalent of 74 full-time employees.

18.7 million pounds of fresh produce provided to hungry families.

1,677 community food shelves serving 5.88 million pounds of food.

528 partner agencies engaged to reach hungry neighbors with emergency food.
The Gleaners Legacy Society

The Legacy Society honors those who are champions in the fight against hunger in southeast Michigan and shall ever be remembered for their volunteer efforts.

The Legacy Society Members:
- Nancy Bacon
- W. DeWayne Wells
- Thomas and Connie Lipari
- Michael and Adele Acheson
- Walter and Donna Young
- The Weingartz Family
- Wayne and Joan Webber
- The Holley Foundation
- Heritage Bank
- The Coleman and Shirley A. Foundation
- Eugene and Lois Miller
- Ashley A. Fortman
- More than 120 individuals who make our work possible every year.

The Gleaners President’s Table is comprised of individual, corporate, and foundation donors who have contributed $15,000 or more in food, funds, or volunteer hours to help solve hunger in our region.

Food Drives & Events

To hold a food drive or support an event, please contact Stacy Averill, Senior Director of Marketing, (313) 923-3535 x322 or saverill@gcfb.org

Volunteer

You can help Gleaners in a variety of ways: packing food for distribution, mailing letters, or even at one of our special events. Individuals, families, and groups are welcome. To help, please visit www.gcfb.org/volunteeropportunities.

Other Ways to Give

There are a lot of ways you can make a difference in the lives of our hungry neighbors. Browse our list of other opportunities at www.gcfb.org/waystogive.

THE WILD SIDE OF GLEANERS

Every day, the Gleaners team is hard at work to serve our hungry neighbors. But we also know how to let loose. During the summer, the staff visited the Detroit Zoo for Gleaners’ annual summer retreat. We had fun, we learned some, but mostly we celebrated the joy of working together.

The team got in touch with their wild side with a photo challenge. Here is a glimpse into how Gleaners team members like to have fun!
