- Linux

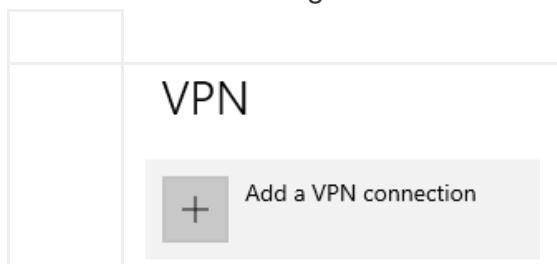

## Setup for Windows 10

For all other OS Setups please contact NuWave Support at [support@nuwavepartners.com](mailto:support@nuwavepartners.com)

Open the Start Menu and go to Settings.

1. Search for VPN Settings

- 2.

Select Add a VPN Connection

3. Enter the Following information

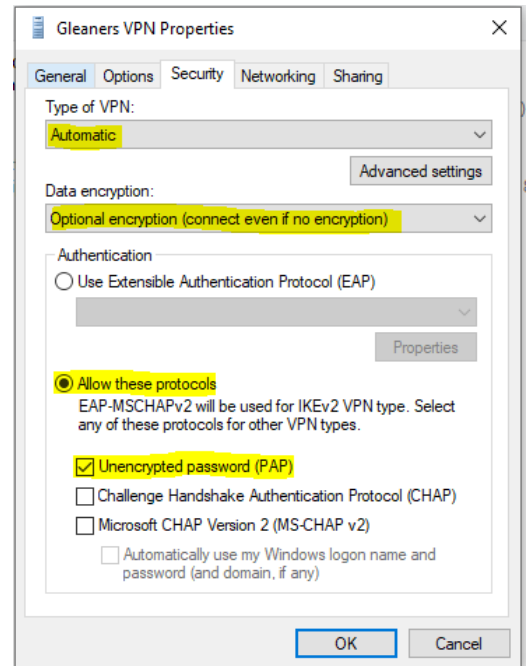

1. VPN Provider: Windows (built-in)
2. Connection name: Gleaners VPN
3. Server name or address: vpn.gcfb.org
4. VPN type: L2TP/IPsec with pre-shared key
5. Pre-shared key: GCFBgcfb2020!

6. Type of sign-in info: User name and password
7. User name: Work username (fLast)
8. Password: Work Password

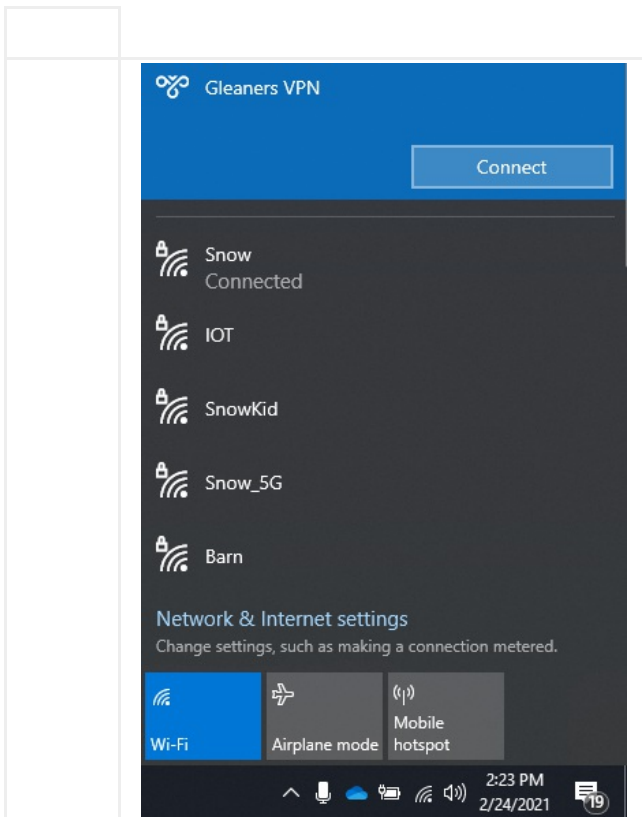

Save

5. In the same window under Related Settings find and open “Change adapter options”
6. Find the connection called Gleaners VPN and right click on it and go to Properties.
7. Go to the Security Tab and confirm the highlighted fields match the picture below. Sometimes windows updates will revert these settings. If you are unable to connect in the future please refer to this image to the right.

Select OK when the fields match

8. Go to Wifi Networks in the system Tray and connect to the new Connection.

Shown bellow.
