

Food Safety Training

All Gleaners Member Agencies *must* have at least one staff person with current Food Handler Certification from a food safety training course approved by Gleaners. Approved trainings are *ServSafe Certification* and *Michigan Food Handler Classes*, or other approved safety training curriculums.

If your Agency utilizes food provided by Gleaners to *prepare meals onsite*, your key food service program staff are required to meet local commercial food safety standards, including obtaining *Managerial level* food safety certification.
